Cruise Cat offers the first feature of this kind in any PC pointing device. To quickly launch a program or activate a shortcut you just press the Gestures  button, draw a symbol with your fingertip, and presto!

While you decide which shortcuts and programs you want to add to your own Gestures menu in the Mouse Control Panel, Cruise Cat gives five pre-set symbols to start you off...

- **maximize window (M)**
- **minimize window (-)**
- **close app (X)**
- **copy (C)**
- **view bookmarks (B)**

To learn how to program your own stuff, see page 3 in Cruise Cat's User's Guide. Good luck & have fun surfin'!
